DETAILED ACTION

Allowable Subject Matter

Claims 1,2 and 4-37 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant has amended the independent claims to incorporate the allowable subject matter as stated in the previous Office action, which stated that prior art of record fails to teach the method of making a tunable DBR having the cladding layer valence and conduction bandgaps specified in claim 3. Prior art of record also fails to teach the method of making a tunable DBR with electron and hole confinement regions, such that the energy levels of the lowest conduction band and the highest valence band of the waveguide increases across the thickness of the waveguide, and that the electron confinement region occurs at the local minimum of the energy level of the lowest conduction band and the hole confinement region occurs at local maximum of the energy level of the highest valence band.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
